Senior Java Developer

Summary:

- **Eight Years** of professional IT experience as a Programmer Analyst and Software Engineer with full project lifecycle development in **J2EE** technologies. Played important roles in **Requirements analysis, Design, Development, Testing and Deployment** of software applications.
- Project implementation skills using both core and advanced Java technologies such as **Java BW, Servlets, JSP, EJB, JNDI, JDBC, XML, JUnit, Web Services and Hibernate** with various middleware technologies.
- Worked on projects for **Insurance, Healthcare, Warehousing and Banking** business lines.
- Extensive knowledge and implementation skills in **frameworks** (e.g.: **Struts, spring, independent frameworks and Tiles**).
- Extensive experience with server-side programming and technologies such as **J2EE, Servlets, Java Beans, JDBC, JNDI and Enterprise Java Beans (EJB)**.
- Extensive experience in Design Patterns and their application in enterprise software design and application architecture.
- Excellent experience with Application servers and Web servers and a wide variety of development tools (IBM WebSphere Application Server 5.1x/4.0/3.5, **WSAD 5.1x/4.0, Eclipse, RAD 7.0, RAD 6.1, Tomcat 5, 6**).
- Expertise in using scripts like **jQuery, JavaScript, AJAX, Dojo**.
- Superior analytical skills in **Object Oriented Application Development** using **UML- Rational Rose**.
- Expertise in developing database applications using **Oracle, DB2**.
- Experience with unit testing using **JUnits** and writing build scripts for **ANT**.
- Have hands on experience on **Adobe Flex**, and **iBatis**.
- Have good knowledge in developing Multi-Tier Web applications using **VB.NET, ASP.NET, ASP, Visual Basic 6.0, VBScript, JavaScript, Internet Information service (IIS)** (Developed non-commercial websites using ASP.net).
- Have good working knowledge of **Adobe Lifecycle data services (LCDS)/ blaze DS**.
- Have good working knowledge of **JSF**.

Education:

- Bachelor's in Engineering, JNTUK University, India

Technical Skills:

Languages	Java , XML, XSL, C++, C, SQL, PL/SQL, HTML/DHTML
J2EE Standards	JDBC, JNDI, XML Deployment Descriptors.
Web Technologies	JSP, JSF Servlet, EJB, Dojo, jQuery, JSON, Java Script, Struts 1.1,1.3.9, Struts 2, XML, Spring 2, Tiles 2.0, Dojo, AJAX, iText,
Database	Oracle 8i/9i, DB2, SQL Server, MS Access, MySql.
IDE	RAD v6.0, RAD v7.0, Eclipse, NetBeans, IBM Visual Age,
Web/App Servers	IBM WebSphere Application Server 4.0/5.x, 6.1 Apache Tomcat, Web Logic4.0, JBoss.

Operating Systems	Windows 95/98/NT/XP, UNIX.
CASE Tools	Rational Rose 4.0
EAI Tools	Vitria BusinessWare 4.3
Other Tools	Log4J, iText.

Professional Experience:

Equifax, St.Louis, Missouri
Senior Java Developer

Apr 2016 - Present

Gutenberg

This is the data modernization project, the objective of which is to simplify the file loading experience for employers by taking the different files and mapping them to the common data architecture format. Loading the common data architecture files into the non-purposed repository and using the services to deliver verifications.

Responsibilities:

- Involved in various phases of Software Development Life Cycle (SDLC) of the application like **Requirement gathering, Design, Analysis and Code development.**
- Worked on **Agile** and Pair programming with respect to the successful development of sprints by tracking stories in **JIRA** and updating JIRA on day to day basis.
- Responsible for designing dynamic and multi-browser compatible pages using **HTML5, CSS3, JavaScript, jQuery, AngularJS, DOJO, JSON, AJAX** to the requirement of the client.
- Worked on the **MVC** architecture of **Angular JS** in developing the Single Page Application (**SPA**), build the controllers and directives which are totally customized to meet the needs of the application.
- Used **Spring Web MVC** framework for the applying MVC Implementation to the web application.
- Implemented the **Dependency Injection** concept using the Spring IOC container.
- Implemented large scale pub-sub message queues using Apache **Kafka**.
- Worked on **NoSQL** database schema to help migrating legacy application's datastore to **Cassandra**.
- Used the **JSP** framework to design the **presentation** layer and to implement server side dynamic pages
- Designed and developed Service Oriented Architecture (**SOA**) using **RESTful (JAX-RS)** service interface
- Designed **Splunk** dash boards for metrics analysis.
- Used **Hibernate 4.0** with **JPA** framework and developed the DAOs to access/connect to the database layer.
- Worked with **Oracle11g** and used **SQL Developer** to query, monitor and update the Oracle database.
- Extensively used **IntelliJ IDEA** as Application Development Environment for developing the custom applications using the J2EE Frameworks such as **Spring 3.0, Servlets, JSP, EJB, JDBC, and JNDI**.
- Used **JUnit** with **Mockito** testing Framework to test the Applications.
- Extensively used selenium and cucumber frameworks to automate and implement behavior model testing.
- Used **GIT** for **version control** and code management.
- Used **Jenkins** for continuous integration and **Maven** for build process.
- Used Sonarqube to check the code quality continuously.
- Used **Apache Tomcat** to deploy the applications.

- Coordinated with QA team on daily basis using **JIRA** for issue tracking and bug fixing and Project status tracking.

Environment: JDK 1.8, J2EE, Spring 3.0, Hibernate 4.x, HTML 5, CSS, XHTML, JQuery, JavaScript, AJAX, DOJO, XML, Oracle, SQL, PL/SQL, JMS, IntelliJ IDEA, GIT, Service now, JUnit, Tomcat 6.x, Cassandra, Apache Kafka, Splunk, PL/SQL developer.

Horizon, West Trendon, NJ
J2EE/Vitria Developer

Feb 2015 - Apr 2016

E-HRO (Human Resources Organization system)

Cardinal Health is a leader in the health care market. Vitria receives the HR data from the PeopleSoft system, makes required transformations to the data and generates the files for different participating vendors based on a scheduling calendar. A separate web application is used to authenticate, publish and keep track of the files.

Responsibilities:

- Designed and developed a web based **Spring MVC** framework application to publish, display detailed track of the files and Clients.
- Wrote controller classes for all the screens. Wrote JUnits for testing the classes.
- Installed **Weblogic Server** and configured the JDBC Connection pool.
- Written **Ajax, JavaScript, JSON objects** for the web pages.
- Redesigned and Implemented Tiles and Layouts for the legacy project.
- Created **XML and XSL** documents. Parsed the XML documents using Apache Xerces parser
- Written the Transformation code in Java based on the Java reflection technology.
- Responsible for code promotion and deployment during test cycles and production.
- Reworked on **Web services & SQL stored procedures** to improve performance.
- Developed common utility functions in Java for file processing and data manipulation.
- Involved in the creation of new connection models such as file to channel, channel to database, and channel to file.
- Wrote and implemented custom **tags** for presentation logic.
- Developed Unit test cases using JUnit framework.

Environment: UNIX, Vitria Businessware 4.3, Spring 2.5, Weblogic 7.0, java 1.4, java 1.5, Junit 4.3.1, Maven 1.1, CSS, JSPs, JavaScript, jQuery, Eclipse 3.3, XML, XSLT, Ajax.

Social Interest Solutions, Sacramento, CA
Sr. J2EE Developer

Dec 2013 - Feb 2015

Product Control Management Repository (PCMR)

The goal of the project is to provide a “LOOKUP” from EDAM (server for marketing and merchandising department in Etrons) Check-in Screens into the PCMR to retrieve product related metadata fields, provide as “UPDATE” service call from EDAM that will collect all product attribute Changes (updates and deletes) from the PCMR and mass update metadata in EDAM for all affected assets.

Responsibilities:

- Extensively involved in business users requirements gathering and technical walk-through
- Used Eclipse IDE for coding, debugging and testing the application modules

- Used different user interface technologies JSP, HTML,CSS, JavaScript, JQuery, Angular JS and JSON for developing the GUI of the application
- Implemented JQuery AJAX calls to retrieve the data from the data base
- Implemented and worked on claims processing, fraud analysis and reports generations in the application
- Developed Action classes, Form bean classes and Struts configuration file using Struts framework
- Implemented the application modules using Spring Core layer(IOC), Spring Security, Spring AOP, Spring ORM, Spring Batch in order to develop the application
- Implemented Spring Services and business operations Dependency Injection
- Used Object/Relational mapping tool Hibernate to perform data base activities and transactions
- Implemented Hibernate POJO Classes ,Hibernate Configuration file and Hibernate Mapping files
- Involved in the configuration of Struts Framework, Spring Framework and Hibernate mapping tool
- Used different design patterns like MVC, Singleton, Data Access Object, Value Object etc.
- Used Java Messaging Services(MQ Series and JMS) for developing messaging services to interact with different application modules
- Implemented SOA using Web Services and its frameworks Apache Axis, SOAP, WSDL and JAX-RS API
- Implemented Restful web services to perform some business activities
- Implemented Business Process Diagrams, Business Flow Diagrams and Business Rules using IBM BPM
- Involved in configuring hibernate to access database and retrieve data from the database
- Used Teradata/Oracle Server as data base systems
- Created data base tables, stored procedures according to the application requirements
- Developed stored procedures and triggers with PL/SQL
- Implemented SQL injection security checks, html sanitization and other security mechanisms
- Implemented the application using Agile development methodology
- Involved in performance tuning, query optimization, maintaining coding standards and resolving JVM issues
- Developed Maven and ANT Scripts to do compilation, packaging and deployment in Web Sphere app server
- Involved in peer to peer code reviews and cross checked whether coding standards are being followed
- Involved in code versioning, Check In, Check outs and code merging using Sub-Version
- Used JIRA tool for creating change tickets and handling production bugs and development tasks
- Involved in production support, resolving the production issues and maintaining the application server
- Configured JNDI resources, Data Base resources, MQ Series and other configurations on the Application Server

Environment: Java 1.7, J2ee, JSP, Servlets, Struts, Spring, Hibernate, Web Services, SOAP, WSDL, REST, Apache Axis, IBM Lombardi, SQL, PL/SQL, XML, XSD, JAXB, JavaScript, Web Sphere 8.x, RAD, HTML5, XML, AJAX, JQuery, Angular JS, JSON , Maven, SVN, SQL Developer, Teradata, Oracle, UML, JUnit, Log4j, TestNG, JIRA, Hudson

General Electric, Albany, NY
Senior Java Developer

Nov 2011 - Dec 2013

RightFax

It is a mechanism for allowing faxes to be sent, received and manipulated on your desktop. In order to do this incoming analogue faxes are converted to a digital medium by the RightFax server before being passed on to the end user. In the same manner outgoing faxes are converted from a digital medium to an

analogue format that can be interpreted by fax machines. This means that the end user no longer requires a fax machine to send or receive faxes.

Responsibilities:

- Worked on **Agile** Methodologies by creating and working on new stories in **JIRA** and updating JIRA on day to day basis.
- Experienced in developing Software components using agile development practices.
- Performed the research and development tasks to design and develop new software components.
- Experienced in using J2EE Web Framework **Spring 3.0 (Data Access Objects and Spring Web Flow)**.
- Involved in developing the persistence logic and mapping files in **JPA ORM**.
- Extensively used **Eclipse** as an Application Development Environment for developing the custom applications using the J2EE Technologies.
- Extensively created **Session** and **Message Driven Beans** in **EJB**.
- Extensively worked on developing the custom web based applications using **HTML 5, CSS, JQuery, JSON, AJAX, DOJO, Angular JS and XML**.
- Responsible for writing **SQL** queries and **PL/SQL** packages in generating **Data Access Objects (DAO)**.
- Experienced in writing Unit Test Cases using Frameworks like **JUnit**.
- Designed and developed the screens using **JSP** with **client side validations using JavaScript**.
- Experienced in Designing and Consuming **RESTful (JAX-RS)** based Web Services.
- Experienced in Using **SOAP UI** to test the Web Services.
- Used **Jenkins** for continuous integration and **Maven** for build process and **SVN** as version control.
- Used **Apache Tomcat** Server to deploy the applications.

Environment: JDK 1.6, J2EE, Spring 3.0 , JPA, HTML 5, CSS, JavaScript, DOJO, Angular JS, XML, Oracle, SQL, PL/SQL, Eclipse, UML 2.3, Jenkins, subversion (SVN), HPLAM, SoapUI, JUnit and Tomcat 6.0.41.

Triveni IT, Rutherford, NJ

Oct 2010 - Nov 2011

Java Programmer**Money Send**

It enables consumers to move funds quickly and safely-to friends and family or to their own accounts and receive disbursements from businesses and governments, leveraging the trusted and reliable Network. Transfer of funds from one account to another account owned by the same consumer. This includes cash in at a mobile money agent which complements the Money Send Agent Cash Out program from Sender. A Sender may be a consumer, business, government, or non-government organization while the Recipient is a consumer. An Originating Institution (OI) acts on behalf of the Sender to send funds to a Recipient holding an account at a Receiving Institution (RI).

Responsibilities:

- Worked on Agile and Pair programming with respect to the successful development of sprints by tracking stories in **JIRA** and updating JIRA on day to day basis.
- Involved in Object Oriented Analysis Design and Modeling using **UML**.
- Involved in design and development of the custom web based applications using **Servlets** and **JSP**.
- Used JavaScript for error handling, Input validation and Event Handling.
- Extensively used **IntelliJ IDEA** as Application Development Environment for developing the custom applications using the J2EE Frameworks such as **Spring 3.0, Servlets, JSP, EJB, JDBC, and JNDI**.

- Used the JSP framework to design the **presentation** layer.
- Designed and developed the web based applications using **AJAX, HTML 5, DOJO, JQuery, XML, Rich Faces and JSP**.
- Designed and developed Service Oriented Architecture (**SOA**) using **RESTful (JAX-RS)** service interface with **Spring MVC** to the underlying customer event API.
- Used **Rest Client** and **Soap UI** Tool for testing the custom Web Services.
- Responsible for defining Hibernate Mappings, **SQL** queries and **PL/SQL** packages in generating Data Access Objects.
- Configured and Used **JMS** to send messages from one application to other application internally.
- Extensively created **Session** and **Message Driven Beans** in **EJB**.
- Used **Hibernate 3.0** with **JPA** and **EJB** framework and developed the DAOs to access/connect to the database layer.
- Designed and developed the screens in HTML, JSP with client side validations using JavaScript.
- Used **Bamboo** for continuous integration and **Maven** for build process and **SVN** as version control.
- Wrote the SQL queries and stored procedures in **Oracle 10g** database environment.
- Used **JUnit** with **Mockito** testing Framework to test the Applications.
- Designed and developed **technical documentation** to Production support team to handle various activities in project plan.
- Participated in meetings to monitor data quality and integrity in data purge and retention cycles.
- Performed **Code Reviews** using **Crucible Fish Eye** with tech lead for each sprint to meet flawless code deliverable.
- Updated Technical Design Document to reflect the modifications that are made during development.
- Used **Jboss 6.3.0** to deploy the applications.

Environment: JDK 1.6, J2EE, Spring 3.0 , Hibernate 3.0, JPA, HTML 5, CSS, JavaScript, XML, Oracle, SQL, PL/SQL, EJB, IntelliJ IDEA, UML 2.3, subversion (SVN), JIRA, JUnit, SOA, JMS, Restful services, Rest Client, Soapui, Mockito and JBoss 6.3.0.

Value Labs, Hyderabad, India.

June 2009 - Sep 2010

Java Programmer

eHRMS

This State-of-Art HRMS software is an Enterprise-wide Human Resources Management Solution for effective implementation of any administration Decision, Planning, Organizing, Staffing and Directing in an HR Department. This State-of-art software can also be launched as an Application Service Provider.

Responsibilities:

- Responsible for the systems study and customer requirement study.
- Responsible for the analysis and design of the project.
- Involved in the use of **Java script** for creating **Java Server Pages**.
- Developed Front end Forms in swings using **Forte Java**.
- Extensively worked on **Transact-SQL** in **SQL Server 2000** database wrote stored procedures, triggers and also involved in database design.
- Involved in creation of **Web Services** methods for the web client.
- Extensively wrote **Java classes** in development of middle tier business logic.
- Involved extensively using Web and HTML controls while developing the code.

Environment: JDK 1.2, JavaScript, SQL Server 2000, Forte Java, JSP, Servlets & Windows.
